ANNEX F

Board Accountability – Climate Accountability

Current ISS Policy, incorporating changes:

General Recommendation: For companies that are significant greenhouse gas (GHG) emitters, through their operations or value chain⁸, generally vote against or withhold from the incumbent chair of the responsible committee (or other directors on a case-bycase basis) in cases where ISS determines that the company is not taking the minimum steps needed to understand, assess, and mitigate risks related to climate change to the company and the larger economy.

For 2022, minimum steps to understand and mitigate those risks are considered to be the following. Both minimum criteria will be required to be in compliance:

- Detailed disclosure of climate-related risks, such as according to the framework established by the Task Force on Climate-related Financial Disclosures (TCFD), including:
 - Board governance measures;
 - Corporate strategy;
 - Risk management analyses; and
 - Metrics and targets.
- Appropriate GHG emissions reduction targets.

For 2022, "appropriate GHG emissions reductions targets" will be any well-defined GHG reduction targets. Targets for Scope 3 emissions will not be required for 2022 but the targets should cover at least a significant portion of the company's direct emissions. Expectations about what constitutes "minimum steps to mitigate risks related to climate change" will increase over time.

New ISS Policy:

General Recommendation: For companies that are significant greenhouse gas (GHG) emitters, through their operations or value chain⁸, generally vote against or withhold from the incumbent chair of the responsible committee (or other directors on a case-by-case basis) in cases where ISS determines that the company is not taking the minimum steps needed to understand, assess, and mitigate risks related to climate change to the company and the larger economy.

For 2022, minimum steps to understand and mitigate those risks are considered to be the following. Both minimum criteria will be required to be in compliance:

- Detailed disclosure of climate-related risks, such as according to the framework established by the Task Force on Climate-related Financial Disclosures (TCFD), including:
 - Board governance measures;
 - Corporate strategy;
 - Risk management analyses; and
 - Metrics and targets.
- Appropriate GHG emissions reduction targets.

For 2022, "appropriate GHG emissions reductions targets" will be any well-defined GHG reduction targets. Targets for Scope 3 emissions will not be required for 2022 but the targets should cover at least a significant portion of the company's direct emissions. Expectations about what constitutes "minimum steps to mitigate risks related to climate change" will increase over time.

⁸ For 2022, companies defined as "significant GHG emitters" will be those on the current Climate Action 100+ Focus Group list.
